16" Pump Control Valves in Water Plant in Columbia County Georgia

These type valves have a Solenoid and a Limit Switch. They are also Check Valves with Opening and Closing Speed Control. A Y-Strainer Protects the control tubing.

The Solenoid is large and full ported, making the valve very simple. The Limit Switch is wired through a Relay to keep the motor running during Shut Down. The pump comes on against closed valve, and the valve then slowly opens. In this case, several minutes
